

HSG LEARNING CENTER IN ST.GALLEN

Customer

HRS Real Estate AG
Mr. Marc Müssigbrodt

Description

A new, innovative place for thinking and working is being constructed at the University of St. Gallen. The Learning Center will be a place for students and teachers to exchange ideas. The building comprises four floors with a total area of 7,000 square meters and seamlessly blends into its surroundings.

Task

Automation of central heating, cooling and ventilation systems, separate room regulation via KNX, visualization of building systems on customer's network infrastructure

Execution

2020-2021
