

PT WILMAR NABATI, PELINTUNG – DUMAI, INDONESIA

Customer

Wilmar Group, Indonesien

Description

At the palm oil plantation in Dumai - Pelintung, the Wilmar Group erected two new flour mills. As part of this project, the Wilmar Group is further expanding its existing milling capacity in Indonesia.

Task

Installations for building infrastructure, including the following:

- Lightning protection and grounding
- Light installation
- Distribution cabinets for building infrastructure (high and extra low voltage)

In parallel to electrical process planning, the complete power supply was planned – from the medium-voltage system and transformers to the low-voltage main distributors.

In addition to the almost complete electrical planning exercise, all switch cabinets (medium and low voltage), transformers and compensation equipment as well as the required process

Execution

2018 - 2021
